MDM APP

Starting app Version	Current app Version	Total Release App Versions	Total Issues	Open Issues	Solved Issues	Open Issues Vs Priority
2.9.1.3	2.9.4.5	03	23	06	17	High-04 Medium-02 Low-00

SQA Team Feedback:

After initial testing, We have some high, medium priority issues. We have some high priority issues on Android 14. Others OS dont have those issues like Android 14.

We strongly believe that high-priority issues hurt product quality and user experiences. We need to fix all the issues for better performance and it will bring better productivity and user experience.

This app version is much improved and more stable than the previous version.

Our Testing is ongoing. All the documents will be updated based on the testing.
